

## Reflection Questions

1. Most of the image is very similar to the original including the color scheme and the overall layout and characteristics of the painting.
2. Jesus is not visible in the first painting. The new painting also does not shed as much light in the room. It also has the people less spread out and more together. The old man is wearing a tin' hat while in the first painting, he was not.
3. These differences occurred because in my prompt I was not specific enough to say that the characters were spread out and that Jesus was not visible.
4. The colors were interpreted well and so were the reactions of the people.

5. The amount of light  
did not translate well as  
I did not specify that  
there was a lot of light
